

- ✓ THE END OF DIFFICULT BOXING, FOR YOUR GARDEN EDGES AND LANDSCAPE BORDERS!
- ✓ 1 (ONE) CUBIC METRE OF CONCRETE WILL PRODUCE APPROXIMATELY 80 LINEAL METRES OF SUPER STRONG LANDSCAPE EDGING!
- ✓ VERY EASY! VERY STRONG!
- ✓ CONTINUOUSLY CONNECTED WITH REINFORCING STEEL!
- ✓ 135mm WIDE and 90mm THICK.
- ✓ EASY TO USE, PLASTIC FORMWORK SYSTEM.

We would like to introduce to you the latest innovation in concrete border edging, **Snap-it™ quick edge**.

Research has shown that the company's simple concrete edging and border system is a world first with many advantages over existing systems. Ease, speed of installation and an attractive appearance gives **snap-it™ quick edge** the edge on alternatives like bricks, pavers or concrete poured into difficult-to-construct timber boxing or shutter systems. **Snap-it™ quick edge** is also much stronger than most machine extruded mortar kerbing services and products.

**Superior features for you include;**

- A steel reinforced system which creates super strong edging especially in rugged climates where edging can fracture and step.
- Components are very light and easily transported from site to site.
- Clean, easy to use and requires no machinery.
- Curves, bends and corners can be laid for perfect lines and shapes.
- The finished edging can be trowel finished or roller imprinted to replicate cobbles etc.
- Can be used for vehicular access (Driveway edging).
- Very quick!
- Seriously saves time and reduces labour costs.
- Affordable
- Very simple to use!

We have distributors nationwide and are soon to be in Australia and Global. Major Chain stores will stock **Snap-it™** products also.

We will also be offering **Snap-it™** products to professional landscapers, landscape suppliers, garden centres and boutique stores at trade prices. (Conditions apply).
